

## SOLAR BUG ZAPPER WITH SHEPHERD'S HOOK

### Model No. 24591 Instruction Manual

#### INSTRUCTIONS

FOR FIRST TIME USE: SOLAR LIGHT NEEDS TO CHARGE IN FULL SUNLIGHT FOR 8-12 HOURS WITH THE SWITCH IN THE 'ON' POSITION TO ALL THE RECHARGEABLE BATTERY TO REACH MAXIMUM CAPACITY.

Lights with Crystalline Panels may have a protective film over the solar panel. THIS MUST BE REMOVED PRIOR TO USE. Lights with Amorphous Panels are ready to use.

#### ASSEMBLY & OPERATION

Align tabs on (Part B) with ledges inside (Part A) and turn (Part A) clockwise until tabs are secure. Align tabs on (Part C) with ledges inside (Part B) and turn (Part B) clockwise until tabs are secure. Align tabs on (Part D) with ledges inside (Part B) and turn (Part B) clockwise until tabs are secure. Align (Part E) with the stem (Part F) making contact, turn (Part E) clockwise until secure. Insert the forked end of (Part F) into the ground until stake is fully submerged. NOTE: If the ground is hard and packed, moisten the ground with water before inserting the stake to avoid breakage. Use a rubber mallet (not included) if necessary, to gently tap stake into ground.

Hang assembled (Parts A, B, C, & D) onto the hook (Part E).

The solar light can be used for both lighting and bug killing purposes. Switch to "LIGHT" for solar lighting or "UV" for bug killing.

**CAUTION: WHEN SWITCHED TO ON, THE NET INSIDE WILL PRODUCE A HIGH VOLTAGE WHICH ZAPS BUGS. CAUTION WHEN HANDLING EVEN IN "OFF" MODE.**

#### TO CLEAN:

NOTE: Do not use water to clean. Push the power switch to the "OFF" position. Remove (Parts C & D) from (Parts A & B), exposing the metal grid. Carefully set (Parts C & D) aside. Clean using a dry, soft cloth, an old toothbrush, or canned air. After the metal grid is clean return (Parts C & D) to (Parts A & B).

NOTE: Some parts may come pre-assembled.

#### TROUBLESHOOTING

If light doesn't turn on, remove battery, wipe both ends with a clean, dry cloth and re-install battery. Check the battery to ensure that it is making secure contact with the terminals. If this doesn't work, replace with new battery. If the light does not turn on after charging, make sure the slide switch is in the "ON" position.

#### REPLACING THE BATTERY

Slide the power switch to the "OFF" position. Rotate (Part A) and remove from (Part B). Using a screwdriver, remove the screw from the battery cover (Part G). Remove (Part G). Remove old battery and replace with a new lithium phosphate 3.2V, 400mah AA rechargeable battery. Replace (Part G) using the screw removed earlier. Slide the power switch to the "ON" position. For optimum performance, allow battery to charge in full sunlight.

**WARNING:** Do not dispose of lithium phosphate batteries in municipal waste stream or by fire as batteries may explode. Do not open, short circuit, or mutilate batteries. Dispose of batteries in accordance with Local, and Federal regulations. Contains no toxic metals. Do not mix old and new batteries. Do not mix alkaline, standard (Carbon-Zinc, or rechargeable (Nickel Cadmium or Nickel Metal Hydride) batteries with Lithium Iron Phosphate (lithium phosphate) batteries.

#### 1-YEAR LIMITED PRODUCT WARRANTY

This product is covered under a one year limited warranty. Fusion Products Ltd. warrants to the original purchaser that this product is free from defects in materials and workmanship for the period of one year warranty from date of purchase.
